Updated as of 10.26

ROTATIONAL IMPACTS

The Mips® system is designed to provide added safety for helmets in many accidents. For certain impacts, the Mips system can reduce harmful rotational motion that might otherwise be transferred to the user's head.

INSTRUCTIONS

6-Point Strap Removal

1. Remove the suspension from the hard hat.
2. Place the suspension with the Mips® layer up and the ratchet knob towards you.
3. Slide the horizontal 6-point strap out of the suspension.
4. Install the 4-point suspension back into the hard hat.

Suspension Assembly

1. Insert tab into slot and push down until tab locks in place. Repeat for all tabs.
2. Push down the suspension until it is firmly in place.
3. Turn knob to fit the suspension to proper head size.

LEARN MORE

About the Mips® Safety System Technology

When inserting suspension, front of hat can be determined by markings on the underside of the brim.

*The HPT26PTSUS is sold separately and required to convert HPT2R541M to 6-point.
