

# RIDGELINE® FULL BRIM

## SIGNATURE STYLE, PROVEN PROTECTION

Experience top-notch protection with the Ridgeline® Full Brim hard hat. Its durable ABS shell provides superior impact resistance and lightweight comfort, while the full brim design ensures maximum coverage from environmental hazards. The innovative adjustable, swinging ratchet suspension allows the hard hat to sit lower on the head for a more comfortable fit. The ratchet suspension offers effortless adjustment, fitting sizes 6.5 to 8 securely.

## FEATURES

**Robust, Lightweight Shell:** ABS shell ensures durable, lightweight protection

**Complete Cover:** Full brim design ensures maximum protection from environmental hazards while enhancing comfort and visibility

**Accessory Compatibility (Vented Only):** Universal accessory slots to add additional protection

**Effortless Adjustment:** 4 or 6-point swinging ratchet suspension easily adjusts to provide a perfect fit across all head sizes

**Enhanced Ventilation (For Select Models):** Strategically placed vents improve airflow and reduce heat buildup, providing cooler wear during extended use

**Hygienic Solution:** Replaceable sweatband promotes cleanliness and comfort

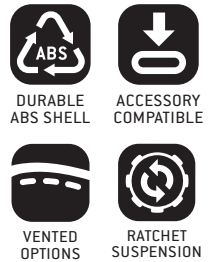

**Engineered Toughness:** Meets ANSI/ISEA Z89.1-2014 Type I,  certified for CAN/CSA Z94.1-2015 Type I to ensure durability and confidence in performance

HP6PTSUS – Transforms 4-point suspensions to 6-point for cap style and full brim hard hats

## REPLACEMENT PARTS

HPRBANDR – Ridgeline cap style and full brim hard hat sweat suspension

HPR541 – 4-point ratchet suspension

## MATERIALS

Shell: ABS (Acrylonitrile Butadiene Styrene) Plastic
Sweatband: Polyester + Polyurethane (PU) Foam
Suspension: HDPE (Polypropylene) + High Impact Nylon

⚠ WARNING: Cancer and Reproductive Harm – P65Warnings.ca.gov

## MARKINGS

Standard: ANSI/ISEA Z89.1-2014 + CAN/CSA Z94.1-2015
Type: Type I Full Brim Hard Hat
Class: Non-Vented – Class E (Electrical) Rated for 20,000 Volts, Vented – Class C (Conductive) Does Not Offer Electrical Protection – Class G (General) Rated for 2,200 Volts
LT: Low Temperatures Protection up to -22°F HT: High Temperatures Protection up to 140°F
HV: Meets All Requirements for High-Visibility (HP54131, HP54141, HP54131V, HP54141V)
Date Code: Indicates Month and Year Shell was Molded - Does Not Indicate Service Life.

Product markings may vary // Updated as of 11.25

## GENERAL SPECIFICATIONS

Weight: 378 gm
Shell Thickness: 1.7-4 mm
Dimensions: 31 x 27 x 15.2 cm
Suspension Adjust Sizing: 6.5 to 8
Suspension: Adjustable with Ratcheting Wheel

## PRODUCT GUIDELINES

Never alter or modify the shell or suspension system. Always use original replacement parts. Decals/stickers are acceptable if they do not affect a hard hat's protective rating or make it difficult to find damage.

Inspect your hard hat shell and suspension on a regular basis. Check for cracks or faulty parts each time it is to be used. If you notice any sign of damage, the faulty part should be discarded and immediately replaced. Inspect the hard hat each time before use and replace immediately if there is any sign of damage.

The service life of a hard hat begins when the hard hat is put into service. Maximum service life is 5 years for the shell and 1 year for the suspension, beginning immediately upon first use. If the hard hat has received a considerable strike, it should be replaced immediately, even if there is no visible damage. Only use genuine Pyramex accessories and replacement parts that have been approved for use with this helmet.

Clean only with mild soap and lukewarm water. DO NOT USE paints, chemicals, gasoline, or similar substances on the hard hat. If these substances are applied on the shell, its impact resistance and other features could be decreased and could be dangerous for the user.

Store hard hat in a cool place out of direct sunlight. Do not store in vehicles where the interior temperature can become extreme and cause deterioration of the hard hat.
